

Ricoh Smart Lockers

Today's flexible work model and distributed workforce requires elevated office experiences that securely provide storage space for personal belongings, decentralized IT support and secured equipment inventories as well as redefined processes for mail and parcel distribution.

Smart lockers are the solution.

What is a smart locker?

Smart lockers are an innovative combination of flexible workspace storage and the latest connected technology. They provide advanced storage solutions with 24/7 manageable access, end-to-end usage tracking, more efficient business processes, automation, and full reporting capabilities.

Smart lockers transform the workplace, from the way incoming mail and parcels are handled to decentralizing IT devices and equipment inventory. Smart lockers also improve accountability, governance and enable connectivity with other smart devices for more flexibility and ease of use.

Much more than just a storage solution, Ricoh's Smart Lockers enable:

- Improved convenience, flexibility, and usage
- Greater security and governance
- Process and workflow efficiency
- End-to-end user visibility and management
- 24-hour access with advanced security options
- Reporting and accountability tracking

Four ways Ricoh's Smart Lockers can help businesses

Ricoh offers four types of smart lockers for key business applications. All lockers are customized to suit your space requirements, business needs and operations and we'll take care of everything from design, installation, ongoing service and maintenance and even staffing.

1. Smart Lockers for Personal Storage

Modern and agile businesses with distributed workforces require personal, and in some cases, team storage options. Ricoh's Smart Lockers for Personal Storage securely provide temporary storage for personal belongings as well corporate assets, giving you greater visibility and control across your property portfolio. With Smart Lockers employees can reserve a locker in advance directly from their mobile device or on-demand via a touch screen console, making it easy and hassle-free to enjoy the perks of being in-office.

2. Smart Lockers for Mail and Parcel Management

Make the mailroom a hub of productivity with the power of automation and digitized storage spaces. Ricoh's Smart Lockers for Mail and Parcel Management enable mailrooms to securely handle the growing volumes of parcels and mail, offering a modern approach to distribution management. With end-to-end accountability, our smart lockers make it easier than ever for your employees to get their mail when it works for them, without compromising on security protocols and governance policies.

3. Smart Lockers for Inventory and Asset Management

Futurize the way you store, access, retrieve, manage and track company assets. Our Smart Lockers for Inventory and Asset Management are equipped with clear doors, bright interior lighting and charging ports to make viewing and storing items even easier. With secured self-service storage, users can select and access all types of items from IT and hardware consumables to stationery. Smart security features allow for easy tracking, reporting and cost centre billing. And since lockers can integrate seamlessly with IT ticketing and service management platforms, repairs or maintenance can be as flexible and distributed as your workers.

4. Smart Lockers for Retail Fulfilment (Click & Collect)

Give your customers the experience of flexible and secured shopping. Our Smart Lockers for Retail Fulfilment help you deliver on the promise of an easier, faster shopping experience for online buyers. Once the item is ready for pick-up, the shopper receives a one-time pick-up code that can either be entered manually or scanned on the barcode reader, opening the specific door to their items. Lockers can also be used for an automated, self-serve return process saving customers and employees valuable time.

Take your workplace or retail experience to the next level
