

Streamline NX 25R1: New Features and Capabilities

The integrated solution for device management, scanning and printing—made even better.

Discover the latest improvements to Streamline NX

Enjoy greater flexibility, functionality and productivity in your workflows with the newest updates to Ricoh's flagship on-premises print, scan and device management platform.

Device Management

RICOH Card Reader Management Tool

- Facilitates remote management of card readers, reducing the need for on-site visits and streamlining firmware updates and configurations.

Brother Device Management Support

- Provides a unified management experience for mixed fleets by expanding device compatibility of Brother devices alongside Ricoh devices.

DM Agent Installation Tool Improvements

- Simplifies the existing DM Agent Installation Tool by making it portable and scriptable via the command line, reducing setup time and improving scalability.

Print

Enhanced Mifare and PKI Authentication

- Encrypted job names can only be unmasked using the correct private key for decryption, protecting sensitive information and improving compliance with security standards.

Streamlined Mobile Printing Access

- RICOH Streamline NX myPrint enables you to simply and cost-effectively offer flexible and secure mobile printing for workers and guests.

Client Secured Print with Cost Center Selection Prompt Enabled

- Improved interface makes for easier navigation, including an enhanced search screen, history of previous cost center selections and more.

Authentication

QR Code on Embedded Login Screen

- Embedded devices now support QR code login via the RICOH Streamline NX for User mobile app, simplifying the login process without compromising security.

Expanded Password-less Authentication

- Now supports Android and iOS-based authenticator devices with passkey support, USB-based or NFC-based security keys and FIDO2 smart cards.

Security

Firmware Check Tasks Support

- Ensures devices are running the latest firmware, improving security and performance while assisting in maintaining compliance with security policies.

Admin Tool Login with SAML 2.0

- Integrates modern authentication methods for a smoother user experience and protected access to administrative tools.

End-to-end encryption via PC Client

- Client keeps data protected, even in cases of device theft.

User Interface

Accessibility Improvements

- Enhanced screen reader compatibility and other UI/UX updates make SLNX more accessible to users with disabilities, ensuring compliance with accessibility standards and improving the overall user experience.

Clear, Accessible Icons

- Enhanced readability for users with color vision deficiencies, improving overall usability and user satisfaction.

Reporting

Enhanced Reports

- Every report template now includes three new columns—Page/Delete/User, Page/Delete/Rule and Pages/Expired—providing additional detailed reporting to help organizations track usage and manage resources more effectively.

Export to .CSV

- Users can now export saved report lists directly to .CSV format, streamlining data analysis and integration with external tools for further reporting or auditing.
