# Workplace 2.0 and Ricoh

RICOH
imagine. change.

Based on the three integrated pillars of change and consistent with Canada Workplace 2.0 Fit–Up Standards, Ricoh offers Federal organizations the tools and solutions required to meet the new office architecture of the future:

The Workplace

Anywhere, anytime with anyone. Buildings: smart, sustainable and strategically located. Workspaces: open, flexible and collaborative.

The Back Office

Break down barriers. Updated information management systems, self-service tools, flexible HR policies, better work/life balance.

The Way We Work

Connect, communicate and collaborate. Web 2.0: collaboration tools. Mobility: laptop, notebook and smartphones. Video-presence: next generation, video-conferencing.

Leading Edge Technology and Automated Workflows

By supporting the Back office infrastructure in the Federal Government with leading edge technology and automated workflows, Ricoh is committed to helping the Federal Government employees connect, communicate and collaborate with each other seamlessly. The goal is to be able to help create a modern workspace to allow employees to effectively work anywhere, anytime and with anyone - thereby changing the way we will work in the future. This will be a key driver for our Federal Government customers allowing them to attract, enable and empower their employees to work smarter and greener to serve Canadians better.
