

Ricoh Sign & Graphic Professional Services

ONYX Certification

Training overview

Training content will be customized based on the variety of jobs in the workflow, substrate complexity, and the physical environment which make each shop unique. Our tailored approach to ONYX Certification allows us to align each engagement to your specific environment.

Ricoh consultants work on-site in your facility to deploy training, reference materials, resources, and exercises. The program is designed around your operators' specific training needs and consists of running live jobs.

Take a **look** at Ricoh Production.

RICOH
imagine. change.

The ONYX Certification is designed to maximize your investment and the effectiveness of your staff through a series of proven hands-on training exercises.

Training topics include:

- Workflow Efficiencies to Increase Capabilities
- Color Management and Color Accuracy
- ONYX Features and Benefits
- Quicksets and Hot Folders
- Buffered Jobs, Job Nesting, and Job Editor
- Technical Reference Materials and Resources

Day 1

- My ONYX: Register for your portal to all ONYX solutions
- Installation and Configuration: install and set up your specific printing hardware
- Component Features: empower ONYX Hub, ONYX Connect, ColorCheck and AccuBoost for the most powerful workflow

Day 2

- File Preparation: utilizing the Adobe Creative Suite, you will learn the best practices of file preparation for color consistency, cutting workflows and specialty ink
- Cut-Server: an application within ONYX that communicates directly with your cutting devices to improve your workflow efficiencies and ensure the most accurate cuts

Day 3

- Color Management: learn the best practices for Pantone® and custom color matching
- Media Manager: create, modify and manage media and print modes; configure printer and color devices; and use advanced tools for assessing color measurement data.

Program Benefits:

Increased productivity

Provide your operators with a complete understanding of ONYX to maintain performance and productivity.

Maximize uptime

Ensure that each and every job is executed with the proper settings the first time to reduce waste and reprints, and keep your work on schedule.

Better preparation

Fully understanding the features and capabilities of ONYX RIP Software gives your operators the confidence to produce jobs quickly and accurately.

Enhanced workflow

Your operators will learn to automate repetitive tasks, manage color accuracy and reduce manual intervention, enhancing productivity and profitability.
