

Ricoh Sign & Graphic Professional Services

Traditional Finishing Services

Training overview

Factors such as finishing experience, variety of job types, substrate complexity, and application make each delivery very unique. Our tailored approach to Traditional Finishing Services allows us to align each engagement within your specific needs.

Our consultants work on-site in your facility and provide training instruction, reference materials, resources, and exercises. The program is designed around your specific training needs.

Take a **look** at Ricoh Production.

RICOH
imagine. change.

The Ricoh Traditional Finishing Services Program is designed to maximize the effectiveness of your staff through a series of proven, hands-on training exercises.

Training topics include:

- Roll-to-Roll Vinyl Cutting Plotter
- Banner Welding and Hemming
- Multi-Material A-Frame Cutter
- Lamination Finishing Services
- Rotary Electric Trimmer Capabilities

Vinyl Cutting Plotter:

- Installation and setup of vinyl cutting plotter
- Plotter software training in relation to designing and outputting printed and non-printed decals

Banner Welder Finishing:

- Proper maintenance procedures to ensure longevity of equipment
- Best practices for hemming banners, pole pockets, and rope pockets

Multi-Material A-Frame Wall Cutter:

- Installation of A-Frame Wall Cutter
- Verify and calibrate measurement guides and rulers

Lamination Finishing Services:

- Laminator maintenance and best practices
- How to web different material using the various webbing paths and take up/supply reels to optimize performance
- Adjustment of rollers, brakes, and temperatures

We understand that no two work environments are exactly alike.

Program Benefits:

Increased productivity

Develop a complete understanding of finishing to maintain optimal performance and productivity.

Maximize uptime

Ensure that each and every job is executed with the proper tools and settings the first time, to reduce waste and rework, and to keep your work on schedule.

Better preparation

Your operators will know the ins-and-outs of signage manufacturing and how to maximize the revenue potential of your finishing equipment.

A competitive advantage

Produce and deliver products with confidence that have consistent quality which can be reproduced.
