

RICOH 3D for Healthcare

Putting the power of patient-specific medical devices into your hands

Ricoh provides unique 3D printing solutions for healthcare. RICOH 3D for Healthcare is an integrated end-to-end workflow solution that makes the production of patient-specific 3D printed medical devices simple, fast and accurate. Now, any medical facility can provide their teams with cost effective 3D printing services that work with existing platforms to serve the needs of patients and providers alike. RICOH 3D for Healthcare makes it possible for U.S.-based healthcare providers to develop the patient-specific representations of anatomy and pathology needed to improve clinician visibility for planning*, informed patient consent and ongoing education.

RICOH 3D for Healthcare is accuracy you can count on.

*RICOH 3D for Healthcare has received 510(k) clearance from the U.S. Food and Drug Administration (FDA) for its craniomaxillofacial (CMF), orthopedic, cardiovascular, neurological, gastrointestinal, genitourinary, and breast applications for patient-specific anatomic modeling.

Simplified solutions for accurate 3D printed medical devices

Quality-controlled point-of-care medical device manufacturing

The rigorous quality system and regulatory requirements of medical device manufacturing can deter hospitals from bringing 3D printing on-site. RICOH 3D for Healthcare offers a quality-controlled medical device manufacturing service that produces patient-specific medical devices within an ISO 13485 compliant quality system. This service is available directly at the healthcare facility at the point-of-care, providing timely access to FDA-cleared medical devices.

Integrated workflow

Ricoh's PACS Print Gateway can connect seamlessly within your existing Radiology workflow. Requests go straight into the Ricoh 3D Case Management Portal. Ricoh's 3D printing services ensure a seamless workflow from image collaboration through to 3D printed patient-specific medical devices.

Expert support staff

Ricoh's expert staff means your facility can avoid additional staffing expenses and get started with 3D printing quickly. Allowing Ricoh's team of professionals to handle 3D printing services provides all facilities access to patient-specific medical devices.

Precise modeling

To meet the demands of any healthcare facility, Ricoh has partnered with best-in-class 3D printing manufacturers. Healthcare teams receive precision 3D printed medical devices that match patient imaging. Ricoh quality control process ensures accuracy of the printed model to the segmented anatomy.

Ricoh. Cleared and certified.

Ricoh's combination of certified expertise, service excellence and history of innovation has helped clients navigate their most pressing challenges. RICOH 3D for Healthcare has received 510(k) clearance from the U.S. Food and Drug Administration (FDA) for its craniomaxillofacial (CMF), orthopedic, cardiovascular, neurological, gastrointestinal, genitourinary, and breast applications for patient-specific anatomic modeling. RICOH 3D for Healthcare has also received ISO 13485 certification on our Quality Management System.
