

# Axon Ivy

Digitize, automate and orchestrate your entire spectrum of core business processes — under one system.

Axon Ivy is solving the most pervasive challenge for enterprise organizations: inefficient business processes created by disparate and disconnected systems.

## Why choose Axon Ivy?

By creating a completely unified digital process automation experience, teams from any department within the organization can become more productive, collaborative and streamlined. With Axon Ivy's complete end-to-end automation and orchestration capabilities, business leaders are eliminating application siloes and improving access to downstream processes and workflows—no matter where the information is stored.

### FAST FACTS

**94%** of business users at enterprise organizations would prefer to use a single unified platform that integrates their applications and builds automated workflows, rather than several systems.

Multiple apps and toggling come with a steep price tag – not just for the product.  
**40%** of productivity is lost to task and app switching.

More than 1/3 of organizations have 5 or more departments that automate some or all of their processes.

Quixy: Trends for Business Adoption of Workflow Automation in 2024

## Axon Ivy is a great fit for any organization with

### 1 Multiple or disconnected lines of business systems

These applications not only create information and workflow siloes, but they also require multiple users to be trained and licensed – costing departments valuable time and money.

### 2 Reduced productivity caused by manual processes

Workflows requiring information from two or more systems often results in users performing data-entry as information moves from one application to another.

### 3 Growth or restructuring targets

Organizations that grow through mergers or acquisitions are often left with disparate back-end systems, across multiple locations, performing the same functions. This creates a need to either integrate them or invest in a larger system that performs all or some of the required tasks.

## How is Axon Ivy being used across businesses and departments?

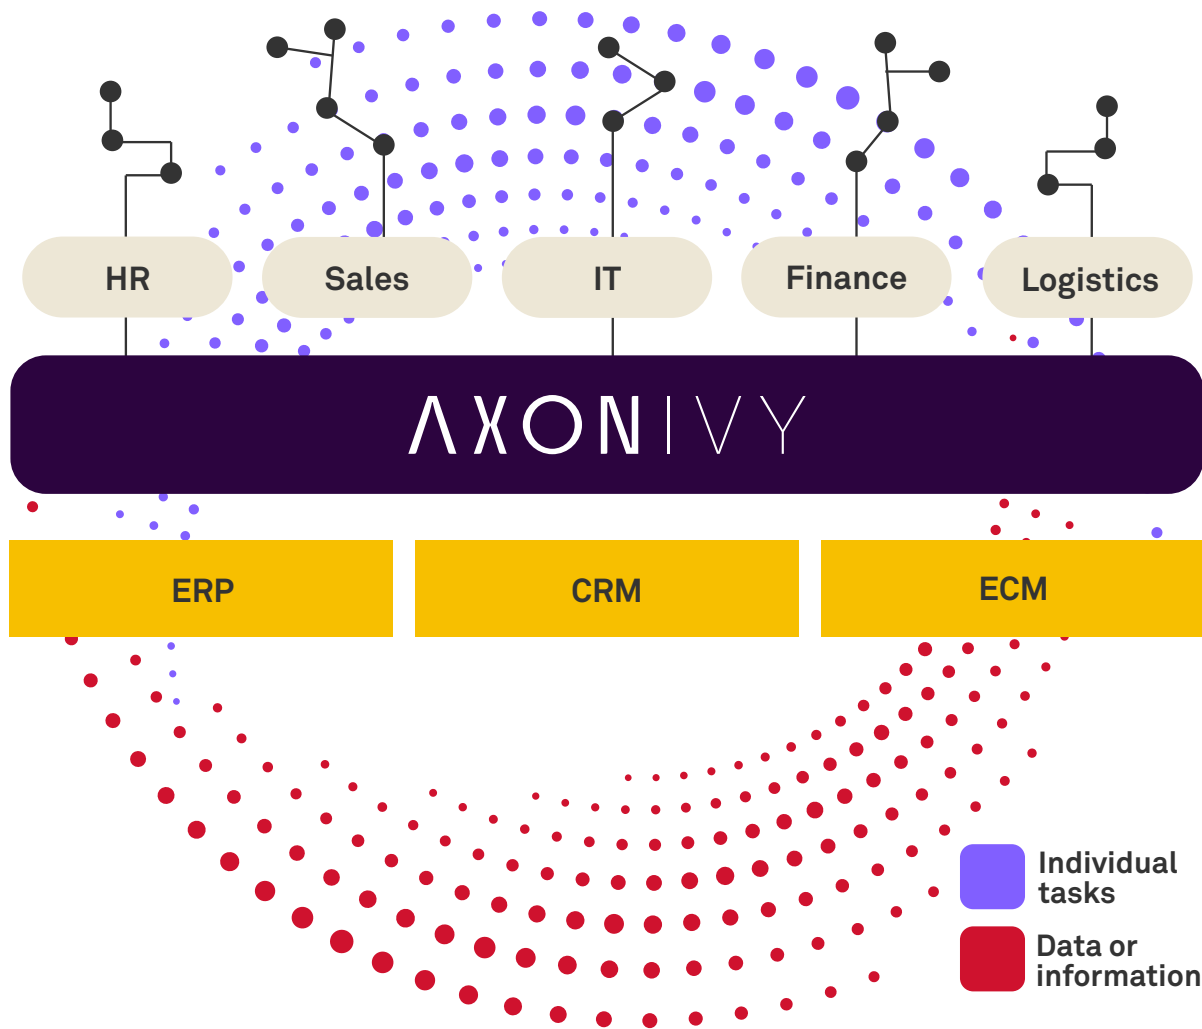

There's no limit to what Axon Ivy can streamline. Here's a look at just some of the ways it's being used:

Human Resources	Sales	Finance	IT	Logistics
<ul style="list-style-type: none"><li>• Onboarding</li><li>• Time and attendance</li><li>• Benefits admin</li><li>• Performance management</li></ul>	<ul style="list-style-type: none"><li>• Sales order management</li><li>• Pipeline or lead management</li><li>• Customer complaint handling</li><li>• Customer information</li></ul>	<ul style="list-style-type: none"><li>• AP invoice processing</li><li>• AR reconciliations</li><li>• Expense management</li><li>• Mortgage origination</li></ul>	<ul style="list-style-type: none"><li>• Access and identity management</li><li>• Procurement and approvals</li><li>• Compliance and data protections</li><li>• Service requests</li></ul>	<ul style="list-style-type: none"><li>• Physical mail distribution</li><li>• Contract management</li><li>• Truck inspections &amp; bills of lading</li><li>• Mobile quality control</li></ul>

### How does Axon Ivy work?

Axon Ivy uses workflow rules to collect information from, and store information within, various backend systems. Business users are no longer required to toggle between multiple interfaces and instead, simply engage with a single-pane-of-glass.

Once implemented to full effect, workflows from across a single department within one organization or within multiple departments, or even multiple organizations, are automatically integrated and all end users have the same information available to them at the same time.

## Powerful business benefits to unlock the most from, and for, your teams:

- End-to-end process optimizations for any business unit, completed in less time
- Unlimited possibilities for seamless digital process automation
- Simplify process builds and deployments with quick and intuitive no/low-code interface
- Enable pro-code deployment with Open Architecture for flexible growth and scalability
- Centralized dashboard for a single access point to multiple systems and sources of data

Experience the simplicity of Axon Ivy with streamlined processes that enable your business to free up IT resources.
