

Ricoh GreenLine™ Series

Remanufactured Products

RICOH
imagine. change.

Boost productivity and cut costs with RICOH's GreenLine Series

The Ricoh GreenLine Series delivers like-new MFPs and printers together with cost and environmental savings you can't get when purchasing new equipment.

Real sustainability, reliability and results

Each product offered within the GreenLine Series of certified Ricoh printers and MFPs has been carefully selected, tested, restored and retested to ensure it delivers superb, reliable performance you can count on day after day. The end result is that you get high-quality systems at a fraction of the cost of new models, all while making a clear statement about your company's commitment to the environment. It's a cost-efficient, eco-friendly solution that contributes to everyone's bottom line — without sacrificing quality or service.

With rigorous remanufacturing standards and a proven process in place, your Ricoh GreenLine Series equipment is designed to perform like new and is serviced only by certified Ricoh technicians.

Ricoh was the first manufacturer to have select remanufactured devices certified to ENERGY STAR® specification version 4.0.

Power up with print software

Thanks to updated software and firmware, integrating Ricoh GreenLine MFPs and printers into your fleet offers a seamless approach to matching the right output capabilities with the right workgroups while freeing up budget for other important investments.

Optional Add-on Software (Available on most models):

RICOH Smart Integration

RICOH Smart Integration allows you to personalize and enhance the capabilities of your GreenLine Series device with applications and solutions readily available from the cloud.

RICOH CloudStream

Simplify print, scan, and device management with a flexible cloud-based platform that reduces IT workload.

RICOH Streamline NX®

A scalable, integrated document management solution designed to optimize print, device, and scan management within mid-market and enterprise organizations.

Better for business performance and the environment

While your company benefits from reliable performance and high-quality output, your sustainability efforts come out a big winner, too. Resource recirculation makes a much greater ecological contribution to your company than simply recycling. Re-using provides the highest net value of resources and provides a higher return on the energy spent on initial manufacture.

Choosing Ricoh GreenLine products makes a statement to employees, investors and customers that you're serious about sustainable business practices in your organization.

Let's talk about the right equipment mix for your business

Some workgroups require Ricoh's most current, cutting-edge technology while others simply need reliable output and a low cost per page. We'll work with you to evaluate your overall needs and determine the best equipment mix to accomplish both your business and sustainability goals.

We address every detail to ensure Ricoh GreenLine products work like new

Before it can be remanufactured, every piece of Ricoh equipment must meet strict eligibility criteria. For machines that are selected, certified technicians then complete the following process:

Disassemble & Clean

- Device is disassembled down to its frame
- Sub-assemblies are cleaned and inspected
- Worn, cracked or fatigued parts, circuit boards, power supplies, clutches and drive assemblies are tested and repaired/replaced
- Panels and casings are refinished
- Firmware updates are installed

Rebuild & Retest

- Device is reassembled and tested, with final testing performed by independent inspectors

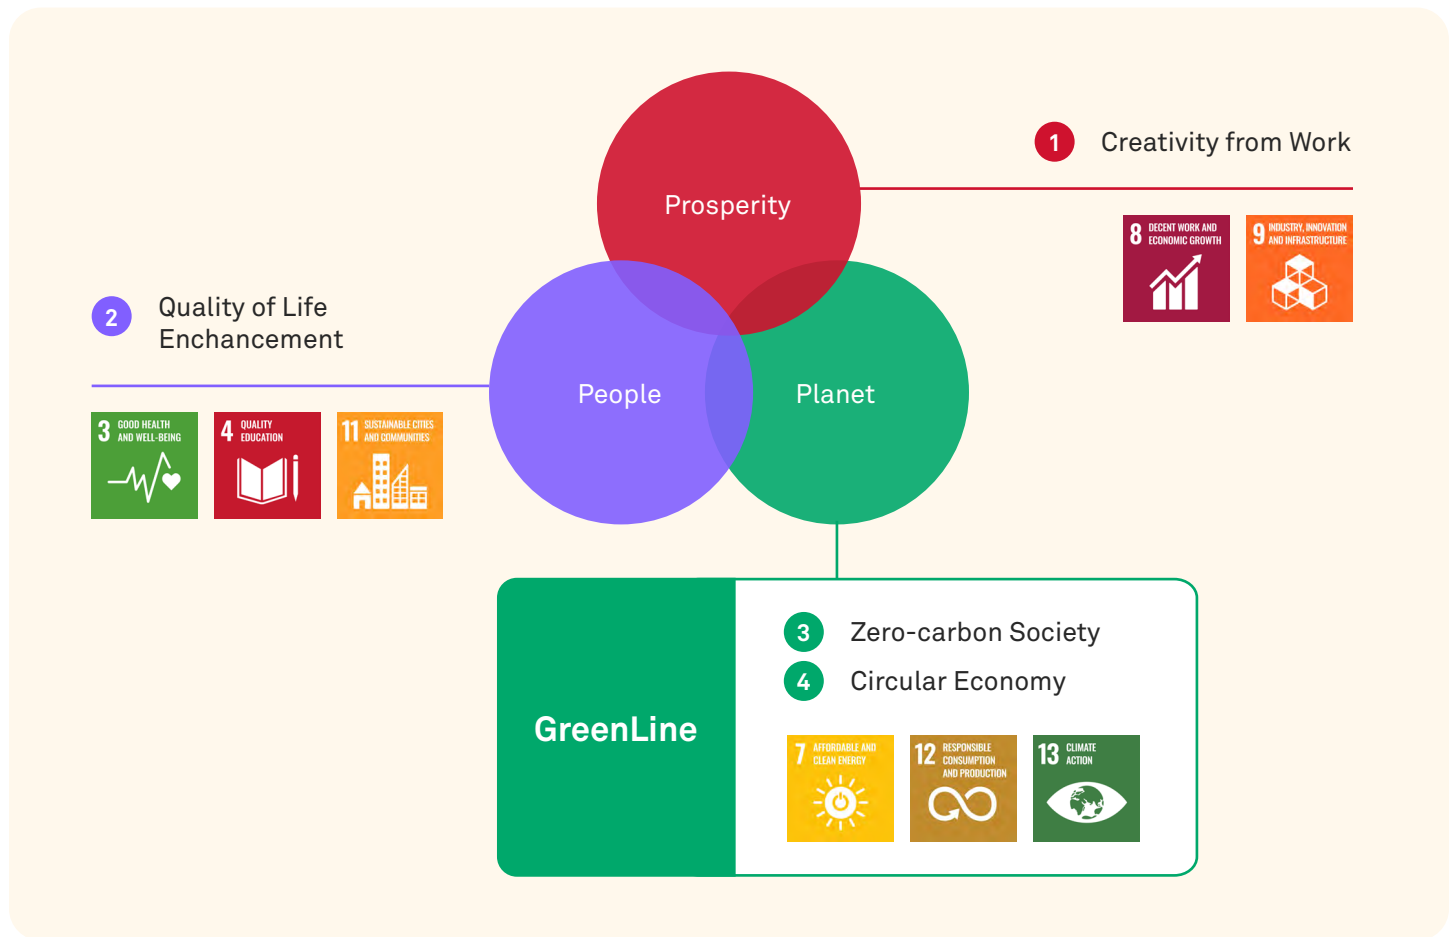

Quality Control

- Device also undergoes standardized safety testing

The GreenLine remanufacturing process is audited and certified annually by The British Standards Institution (BSI).

Sustainable Development Goals

Ricoh's focus: Reduce our impact at every step

Since Ricoh's inception, our environmental strategy has been a strong part of our innovative heritage. Ricoh conducts its business with a concurrent focus on People, Prosperity, and our Planet. It is how we materialize our corporate value system and identify solutions our company can provide.

Ricoh is committed to supporting the United Nation's Sustainable Development Goals (SDGs). As part of these SDG initiatives, we are mindful of our responsibility as a corporate citizen.

The GreenLine Series represents Ricoh's maximum efforts for the effective utilization of resources, directly contributing to the Circular Economy and SDGs of Climate Action (13) and Responsible Consumption & Production (12).
