Ricoh Certified Operator Program

Training overview

Factors such as operator experience, variety of job types in the workflow, substrate complexity, and the physical environment make each job unique. Our tailored approach allows us to align each engagement to your specific environment.

Consultants work on-site in your facility to deploy training, reference materials, resources, and exercises. The program is designed around your operators' specific training needs and consists of running live jobs.

Take a **look** at Ricoh Production.

RICOH
imagine. change.

Our Certified Operator Program is designed to maximize the effectiveness of your staff through a series of proven, hands-on training modules.

Training topics include:

- Advanced User Interface
- Advanced Media Library
- System Color Management
- Routine and Advanced Machine Maintenance
- Workflow and Color Optimization
- Technical Reference Materials and Resources

Day 1

- Ink safety and personal protective gear
- End-of-shift, weekly, monthly, quarterly, and semi-annual maintenance
- Printer operation and RIP software
- Changing materials from rigid and roll substrates

Day 2

- Printer overview and safety components
- Printer capabilities and limitations
- Hands-on exercises that include start up, shut down, and running live jobs

Day 3

- Creating new workflows and output devices
- Printing onto multiple pieces by using the nests and step and repeat functions
- Come away with at least one new product, service, or technique to bring to market, to enhance profitability

We understand that no two work environments are exactly alike.

Program Benefits:

Increased productivity

Develop a complete understanding of the system and software to maintain optimal performance and productivity.

Maximize uptime

Ensure that each and every job is executed with the proper settings the first time to reduce waste and rework, and keep your shop on schedule.

Enhanced workflow

Your operators will learn how to automate repetitive tasks to reduce manual intervention, enhancing productivity and profitability.

A competitive advantage

From unique substrates and specialty ink to superior production, bring exciting applications to your customers and produce more efficiently.
