Each other

Introducing Ricoh Work Anywhere™

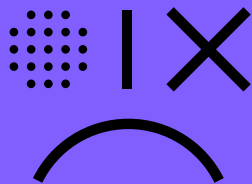

The unexpected is your norm. The exception is the rule.

It’s exhausting. But you make it work.

You live in a constant state of change, leaning on technology to adapt as best you can. You’re using mobile devices like desktops, sharing files, generating reports, and more, from anywhere, anytime. You try to maintain a sense of “team” when you rarely get together in person. And you’re juggling multiple platforms with too many sign-ons just to keep projects rolling.

When **work happens**, you find a way to get through it. But you know you and your team deserve a better way.

It's time for tech to work the way people need it to work.

Introducing Ricoh Work Anywhere™

We see your real challenges, the broken experiences and the hard-to-manage solutions. So, we've built a better way for you. Ricoh Work Anywhere is our flexible, all-in-one digital work solution for the hybrid and remote era.

Created specifically for the needs of small and midsize businesses, Work Anywhere is a centrally managed cloud workspace designed around Microsoft® 365 Business Premium (M365). It's complete and customizable. And it's fully integrated and managed by a single dedicated partner – Ricoh's team of IT Services experts.

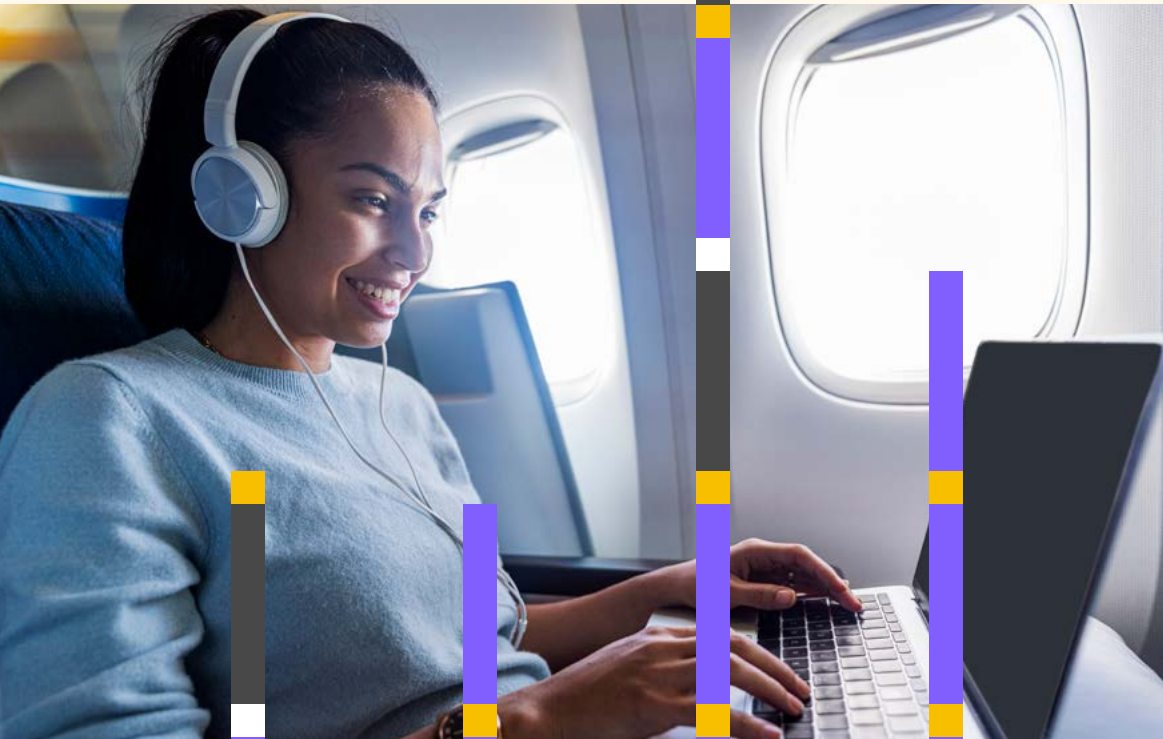

Today your network is distributed on every device, from every location.

Your success comes down to each employee's access to company data, resources, client communications and other team members, without fail. Work Anywhere helps businesses across key areas: security, collaboration and productivity.

Security brings the confidence to access sensitive data on any network.

Collaboration means feeling together even if you're in the office alone.

Productivity levels up performance from just surviving to absolutely thriving.

Better security → Better collaboration → Better productivity → Better

You wish it felt like you were all under one roof again.

Getting there starts with better security for everyone, everywhere.

For a long time, your people figured out how to make do. And while early efforts at a digital workspace met short-term needs, you can't settle for compromised security any longer. Ricoh Work Anywhere prioritizes your team's goals by building a protected, centrally managed secure cloud environment on the Microsoft® 365 security suite. Then, we add an enhanced layer of advanced security on top of this proven foundation.

“Work today gives me more flexibility, but it’s so hard to keep my people pointed in the same direction. Add to that jumping through all the security hoops. What I want is an easier way to connect us all to the important documents we need, whether on the pitch or in a pitch.”

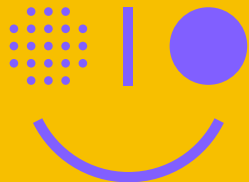

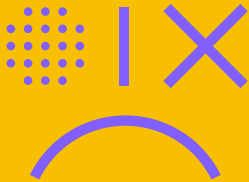

— SVP, Business Development

Reduce the attack surface of your cloud-based work environment.

Work Anywhere gives you:

- A unified solution to eliminate gaps from multiple vendors
- Multi-factor authentication and end-point protection
- Continually updated capabilities to meet new threats
- The freedom to work on any device, from whatever location

Work Happens. → You need Work Anywhere.

You can handle remote. But not isolation.

If you can't connect one-to-one, you're in the dark.

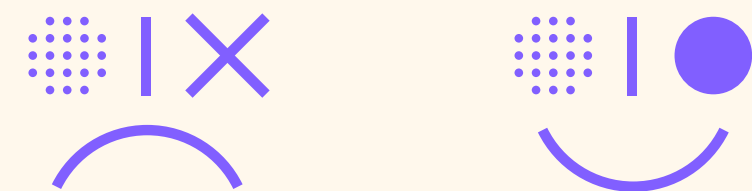

To do your best work as teammates, you need more than just digital connections – you need human connections. Video calls and shared platforms were a good start. But it's time for these tools to better serve people's deeper needs. Ricoh Work Anywhere is built on Microsoft Teams, the industry-leading collaboration app. With it, you have a way to create and maintain authentic, natural relationships.

Unify your team to make better things happen.

Work Anywhere lets you:

- Co-create, comment on and improve work in real time
- View content in a browser and sync devices for offline access
- Be together with real-time messaging and inclusive meetings
- Collaborate like humans again, with people inside and outside your company

Work Happens. → You need Work Anywhere.

“Creating an amazing campaign takes ideas from everyone on my team. But not emailed or posted to a message board. We need to inspire each other in real time, collaborate, work out the big picture and the details. So how do we share headspace when we're in different spaces?”

— Marketing Team Creative Lead

You're tired of feeling like you're working at half capacity.

At the end of the day, solid results still matter.

Okay, poor security makes good collaboration hard. But what's the ultimate cost? Productivity. Without full productivity, businesses like yours can't thrive. To grow, you must improve team-wide efficiency. Ricoh Work Anywhere simplifies the way you work with the trusted Microsoft 365 apps your employees already use. But now, the apps are far more powerful, working on more devices, and in more places. So you can put your full attention back on your goals.

“I’m committed to getting my job done no matter what. But there’s so much work that gets in the way of the actual work I’m expected to deliver. I feel like I’m doing the hard part, plus making up for technology’s shortcomings. Is there a solution that works as hard as me?”

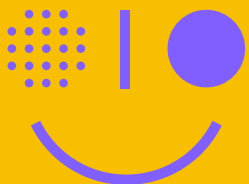

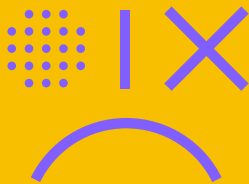

— Real Estate Agent

Rely on this all-in-one productivity tool for every situation.

Work Anywhere increases efficiency with:

- Access to a cloud-connected suite of familiar apps
- Optimized performance across devices
- Up-to-date tools so you’re always up to date
- Automated workflows, simplified tasks and cohesive experiences

Work Happens. → You need Work Anywhere.

You're ready to conquer hybrid and remote work.

Ricoh Work Anywhere helps you turn the corner.

Small and medium-sized businesses must be survivors, taking the good with the bad. But you can't do it with tools built for an outdated, on-premises reality.

Embrace a world of employee-centric environments.

We've seen your challenges and how you're working through them. That's why we set out to create a centrally managed cloud workspace, and why we chose to build it on the Microsoft 365 suite and enhance it with additional security, collaboration and productivity tools.

Beyond just offering an all-in-one flexible solution, our decades of SMB experience help us tailor a package that aligns with your business strategies, accentuates your internal IT strengths and cast a wider vision for what you can achieve.

Ricoh Work Anywhere is:

- A centrally managed cloud workspace
- Proven set of collaboration and productivity tools
- Built and implemented to your specifications
- Integrated and managed by just one team of experts

Work happens.

That's why you need **Work Anywhere™**

Ricoh's flexible, all-in-one digital work solution for the hybrid and remote era.
