

Identify relevant and potentially responsive data fast.

### Where information governance, litigation readiness and eDiscovery converge

OpenAxes is an on-premise identification, collection, smart culling and legal hold solution that allows enterprise customers to easily investigate and analyze data in place, across unlimited endpoints. It is deployed behind your firewall and is designed with minimal infrastructure requirements.

#### Manage in Place

Process hundreds of file formats where they reside on your network for the ultimate efficiency in data analysis.

#### Surgical Data Identification & Collection

Identify, then collect your data from virtually any source including email, file servers and other third party systems.

#### Data & Custodian Mapping

Seamlessly map data sources to the relevant custodians.

#### Intelligent Filtering

Run keyword, metadata and custodian-based searches to cull down millions of records and identify the most relevant.

#### Data Visualization

Results are interactive, with search results presented in timeline and custodian communication charts.

#### Legal Hold Preservation

Apply legal hold to preserve ESI by maintaining data within your firewall.

OpenAxes delivers data insight that enables clients to identify potentially relevant evidence early in the eDiscovery process, while giving greater data control and managing costs.

# OpenAxes

## Unlock the intelligence of your data

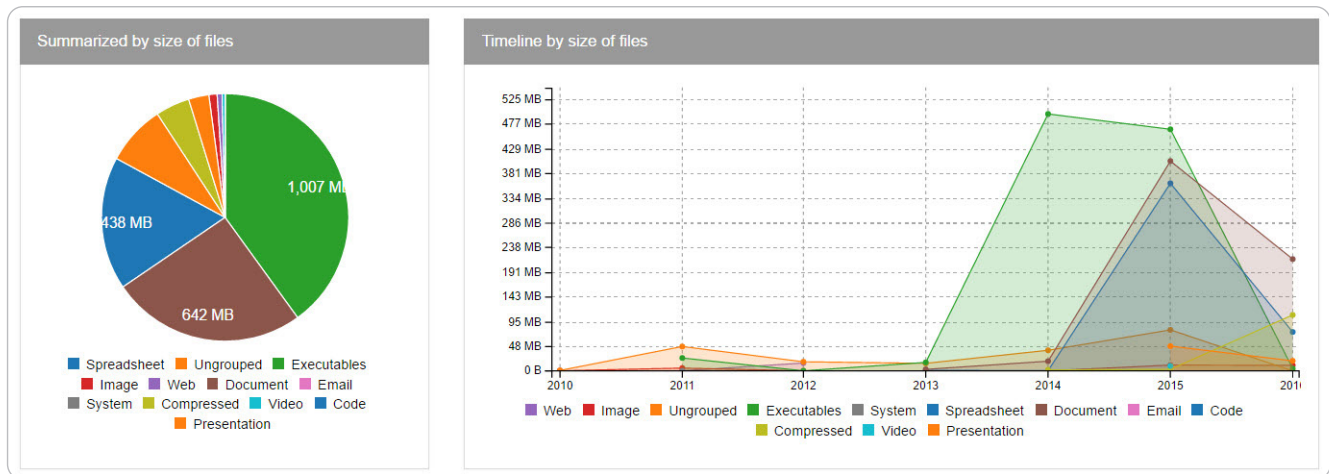

Enjoy the data at your fingertips that empowers you to understand, report and take action based on valid data intelligence. OpenAxes helps you understand your data repositories, isolate duplicates, and gain insight into the relevance and value to your organization. This allows you to pinpoint potential risk, set and audit retention policies, and achieve operation efficiencies.

Lifecycle Management	Simplified Workflow	Deployment Ease
