

Smart Lockers for Personal Storage

Secured, personal storage for employees and visitors

Give your employees access to storage as needed without worrying about forgotten locker combinations or lost keys. With Ricoh's Smart Lockers, employees can reserve the locker in advance from their mobile device or on-demand via a touch screen console. Day lockers are also a great option for customers, visitors, temporary onsite workers, and workplaces with restricted access areas.

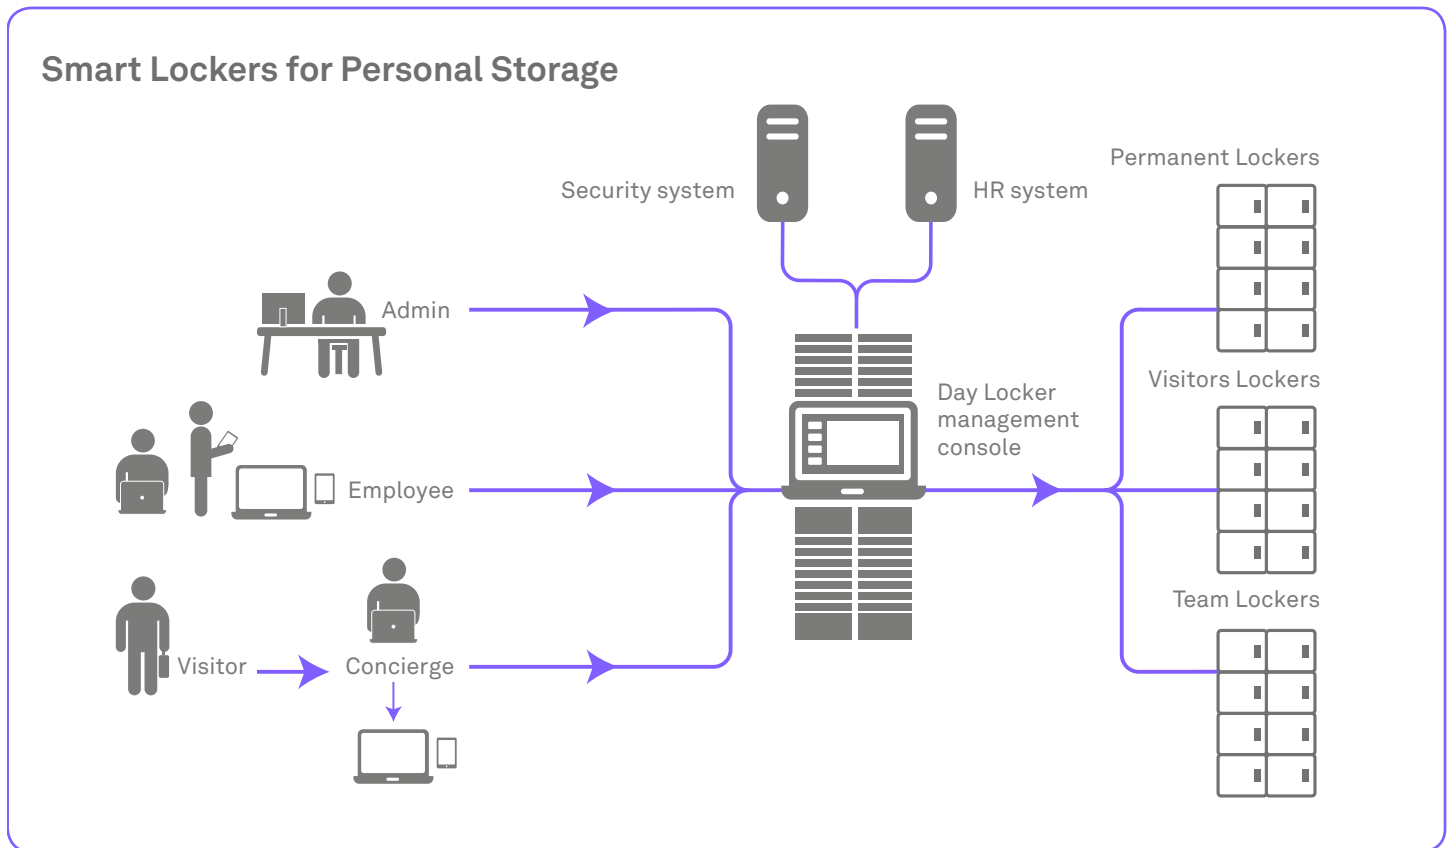

Ricoh Smart Lockers enable multiple storage locations to be managed from a single online portal. With a keyless entry system that uses only a keypad or ID pass/card, the lockers track who is using what locker and how long. You can see at a glance how much of your space is being used and by whom, ensuring that all lockers are fully and correctly utilized.

Key benefits:

- Oversight of your locker real estate
- Allocation of individual lockers
- More efficient utilization of your space
- Modular, extendable, and customizable
- Keyless access
- Online booking capability
- Increased accountability and reduced hoarding
- 24/7 access (or whenever the building is open)

The technology behind our Smart Lockers

Ricoh Smart Lockers provide unique locking technology and facilities management, offering greater security for your employees and ease of control for the business. Management of units is centralized at a locker bank, which can only be accessed via RFID swipe card authentication or a touchscreen interface. This control interfaces with keyless access, touch screen, and RF card readers, offering full accountability and security for all users and with greater control of your property and office space.

Built to suit your needs

Whether you're a large enterprise, a manufacturing business, a university, a hospital, or a school, our range of day locker configurations can help you elevate the workplace experience and increase accountability. Our lockers come in a range of styles to suit your needs, whether it's stand-alone or networked and integrated.

Modular, extendable, and customizable

The modular column design of the day lockers enables them to flex according to your different layout requirements. The size of the lockers is also customizable to accommodate different staff needs. With a variety of modern, classic, and wooden finishes, expect a solution that blends in with your existing workplace.
