

Ricoh Sign & Graphic Professional Services

Router Cutter

Ricoh Certified Operator Program

Training overview

Factors such as operator experience, variety of job types in the workflow, substrate complexity, and the physical environment make each customer unique. Our tailored approach allows us to align each engagement within your specific environment.

Ricoh consultants work on-site in your facility to deliver training, reference materials, resources, and exercises. The program is designed around your operators' specific training needs and consists of running live jobs.

Take a **look** at Ricoh Production.

RICOH
imagine. change.

The Certified Operator Program is designed to maximize the effectiveness of your staff through a series of proven, hands-on training exercises.

Training topics include:

- Interchangeable Tool Heads
- Complete Overview Of Substrate Cutting Capability
- Table Vacuum System
- Routine And Advanced Machine Maintenance
- Optiscout and other Compatible Software
- Technical Reference Materials and Resources

Day 1

- Learn the proper steps for creating cut shapes and placing registration marks for the tools and materials in use
- General overview and operational procedures
- Hands on with cutting software to create custom tool profiles for your specific application
- Create finished products; from concept to reality

Day 2

- Learn the proper procedures to setup, print, crease, and cut a variety of materials to meet your every need. Includes: Cardstock, foamboard, acrylic, etc.
- Create custom tool profiles for different speeds, cut depths, bit sizes, and creasing tools

We understand that no two work environments are exactly alike.

Program Benefits:

Increased productivity

Learn how to use flatbed cutter to maintain optimal performance and productivity.

Maximize uptime

Ensure that every job is produced with the proper settings the first time to reduce waste and rework, and keep your work on schedule.

Better preparation

Confidently produce any job requested by your customers. Your operators will know the ins and outs of signage manufacturing and how to maximize the revenue potential of your Colex Finishing Solution.

Enhanced workflow

Your operators will learn how to automate repetitive tasks to reduce manual intervention thus enhancing productivity and profitability.

A competitive advantage

Using unique substrates and efficient production techniques, bring exciting applications to your customers.
