

Streamline NX

Take your information
management to the NX level

“49% of respondents indicate that the IT
administration burden caused by traditional
print servers is the top challenge they face.

—Quocirca, *Cloud Print Services Landscape*, 2024

Print, scan, fax, share, safeguard, and manage devices with more options and fewer limits today.

Providing reliable services and controlling costs while managing distributed device environments across multiple locations can quickly become a logistical and strategic challenge. Traditional fleet management approaches don't scale—but Streamline NX does.

By consolidating your entire device ecosystem in a unified management platform, you gain full control over your complete fleet, whether it's networked or standalone. Our solution brings print management, scan and capture workflows, and device monitoring together in a single solution—reducing complexity while giving your users a consistent experience across all devices.

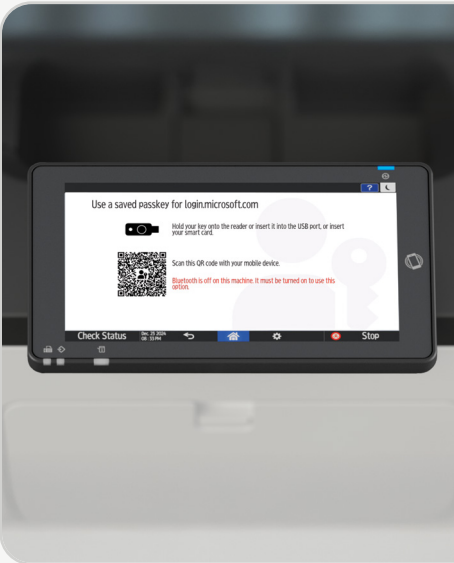

Discover how Streamline NX can centralize your fleet management with:

Enterprise Setup

Rapidly deploy and standardize configuration with simplified functionality and device updates, making integration effortless.

- **Multi-brand support** lets you monitor mixed-brand devices from a single console
- **Batch configuration** with templates created from one device to quickly set up others
- **Automated discovery** via network scanning quickly detects compatible devices, streamlining setup
- **Driver deployment made easy** with flexible download methods and automatic OS detection

Security & Control

With multiple authentication options, secured release printing, user-initiated job release and retrieval, security compliance tracking, and more—usage remains flexible without compromising data integrity.

- **Advanced authentication methods** provide secured access through FIDO2 password-less authentication, smart cards and QR-embedded login screens
- **Card authentication** with your existing building badge makes device access simple and familiar for users
- **Enterprise Single Sign-On (SSO) integration** allows admin tool login through your designated Identity Provider
- **Custom security roles** alongside built-in roles for device group security

Ongoing Device Management

Proactively monitor devices with a brand-agnostic platform to maintain uptime and gain actionable insights for better decision-making.

- **Fleet discovery & monitoring** that auto-detects devices, real-time status and toner/paper levels
- **Remote configuration** for batch updates, firmware management and template-based device setup
- **Predictive maintenance**, which enhances error polling, provides proactive alerts and better service scheduling
- **@Remote Connector NX** enhancement makes data easily consumable through a web portal

Beyond essential device management, Streamline NX delivers extended capabilities that address the evolving needs of today's workforce:

User Access & Experience

Designed for a smooth user experience with strong data protection built in.

- **Intuitive user interface** offers clearer icons, accessible features and an easy-to-understand task log
- **Single sign-on capability** enables unified access, while QR code authentication simplifies and reduces login friction
- Supports a wide range of **authentication options** including HID/iClass, CASI-Rusco, Mifare, and NxtWtch support
- **Supports external directory services** such as LDAP and Kerberos for easier, centralized user and role management

Administration & Reporting

Get customized reports on device fleet management, accounting, security, and planning, while capturing user activity, insights and trends.

- **Unified management console** administers all facets of Streamline NX from a single view
- **Enhanced reporting capabilities** improve transparency and accountability with CSV export options that facilitate data analysis and sharing
- **Custom report styling** via a 3-step setup that can include company branding
- **Manage print budgets** and monitor usage with detailed reporting by user, group, or project

Mobile Support

Streamline NX offers a robust mobile app that lets users securely print, scan and route documents right from their devices—wherever they are.

- **Hybrid workforce ready** with support for iOS, Android and macOS
- **Work From Home (WFH) Client** monitors home office devices, tracks usage and offers supply alerts
- **RICOH myPrint** enables flexible mobile printing—now integrated with Streamline NX
- **Offline capability** allows users to capture data offline, then sync when connected

Scan & Capture

Digitize documents and import content into business systems with high-accuracy OCR for quality and ease.

- **99.8% OCR accuracy** helps convert paper to searchable/editable formats (PDF, Word, Excel)
- Easily **capture and share information** with direct integration to popular platforms like SharePoint, DocuWare, Google Drive, OneDrive, email, and more
- **Zonal OCR and barcode** functionalities target specific data extraction areas for automated workflows
- **Document preview** to easily examine documents before distribution

Print Data Security

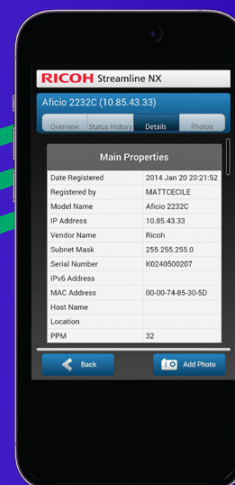

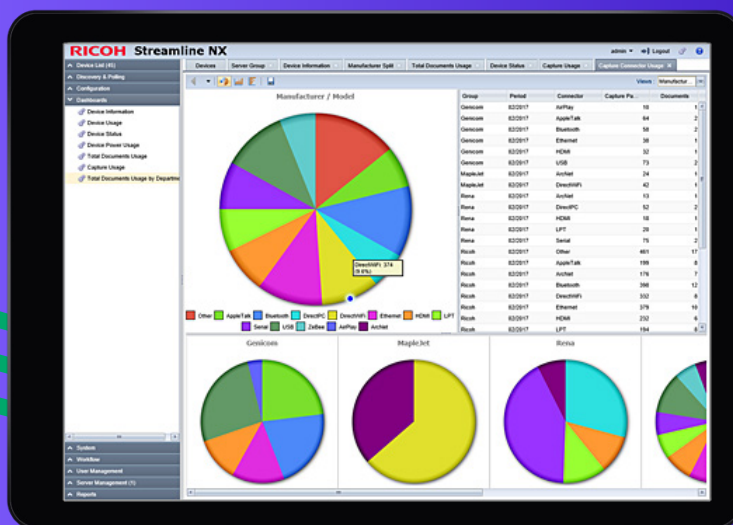

Streamline NX secures every print—from PC to device—with advanced protection that helps prevent unauthorized access and data loss.

- **Safeguard print data** with hold/release options that keep sensitive documents encrypted and accessible only to authorized users
- **End-to-end encryption** keeps data protected, even in cases of intercepted print jobs

Work from Home (WFH) Client

Gain the ability to monitor home office printing and track the status and usage of company devices outside the office.

- **Remote device monitoring** to track company-owned equipment wherever your teams work
- **Usage visibility** with job names, print counts and colour vs. monochrome tracking
- **Supply management** ease with paper and toner alerts and regular maintenance scheduling
- **Compliance support** through historical data retention for security protocols

One platform for complete print and device management

With over 85 years of experience, Ricoh delivers a comprehensive portfolio of print, scan and device management solutions designed to simplify fleet management and keep teams productive across multiple locations.

Our multi-layered approach to security protects sensitive data, enhances compliance and reduces risk across your environment. With support from Ricoh's global service network, expert help is always available to keep operations running smoothly.
