

Ricoh Certified Operator Training

RICOH
imagine. change.

Designed to empower key operators with the knowledge, expertise and resources to maximize print productivity on the Ricoh Pro C9200 series, Ricoh Pro C7200 series and Ricoh Pro 8300 series.

Maximizing productivity is your goal and ours.

We understand that no two print environments are exactly alike.

Maximizing staff & equipment capabilities

The Ricoh Certified Operator Program is designed to maximize the effectiveness of your staff through a series of proven, hands-on training sessions.

Training overview

Factors such as operator experience, variety of job types in the workflow, substrate complexity, and the physical environment make each job unique. Our tailored approach allows us to align each engagement within your specific environment.

Ricoh trainers work on-site in your facility and deploy training instruction, reference materials, resources and exercises. The program is designed around your operators' specific training needs and consists of running live jobs.

Sample topics include:

- Advanced User Interface and Operation
- Advanced Media Library
- System Color Management (where applicable)
- Routine and Advanced Machine Maintenance (TCRU)
- Workflow and Color Optimization (where applicable)
- Technical Reference Materials and Resources

Program Benefits:

Increased productivity

Help your operators understand the system to maintain optimal performance and productivity.

Greater savings

Run jobs with the proper settings the first time to reduce waste and rework, and keep your work on schedule.

Better preparation

Be ready for anything. Once your operators know the ins and outs of the Ricoh Pro C9200 series, Ricoh Pro C7200 series and Ricoh Pro 8300 series systems and how to get the most out of your investment, there is nothing you can't handle: specialty jobs, unique color solutions, brand color matches and more.

Optimal job management

Having operators that can troubleshoot, optimize efficiency, and achieve predictable, repeatable results helps grow your business.

Maximum uptime

Maintain consistent image quality, machine performance, and uptime using Ricoh's Trained Customer Replaceable Unit program.

Enhanced workflow

Your operators will be better prepared to automate repetitive tasks and reduce manual intervention.

A competitive advantage

From unique substrates to superior color matching, bring new applications to your customers and print more efficiently.

First get up and running. Then, get specialized.

Specific requirements and key applications are captured in a customer assessment during the pre-sales phase. This leads to a strategic implementation plan for your new equipment.

What to expect.

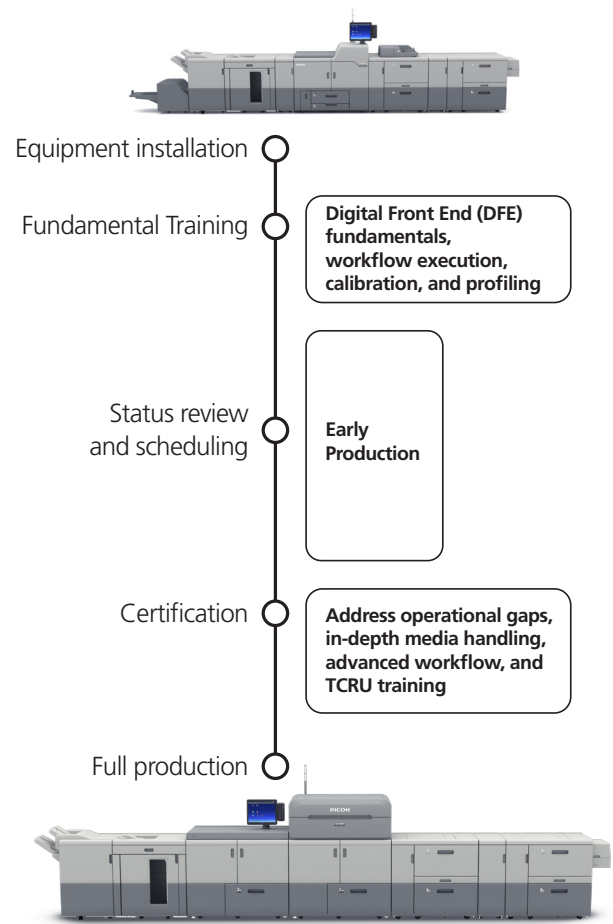

Following your RICOH Pro C9200/C9210 Graphics Arts Edition system installation, your Ricoh production engineer will configure print workflows and provide you with an overview of the system interface, tools and features. This allows you to start printing immediately once the system is brought online. From there, we will give you time to acquire experience on the system within your environment. You will quickly begin to identify specific areas of focus during your next phase of training.

The next phase consists of a Ricoh Certified Operator Program (RCOP) Specialist coordinating the advanced operator training. We design a training deliverable that educates your team on how to utilize the system to its fullest potential and covers its most technical capabilities. The RCOP training typically runs 2 or 3 days with your operators for the initial visit. Running live jobs provides a true hands-on key operator experience.

Once the operators are certified following the RCOP on-site training, a member of Ricoh's G7 Expert team will cover color optimization workflow. This on-site engagement will help solidify color management techniques. A color discovery assessment is used to identify key areas of focus during this phase of operator training.

Phases of Operator Certification:

- Equipment is installed, configured and brought online
- Fundamental training takes place on-site and includes workflows, color and substrates management
- Operators are now ready for live production, managing the system and optimizing specific workflows
- RCOP training is scheduled, delivered, and addresses operational gaps, in-depth media handling, advanced workflows, troubleshooting and TCRU training
- Color management and optimization is assessed and on-site training is delivered by our G7 Expert

Upon completion of the training program, your team members will become Certified Print Operators for their specific Ricoh print device.

Take your output to the next level.

The Ricoh Certified Operator Program for the RICOH Pro C7210X/C7210SX Graphics Arts Edition of digital printing systems prepares your operators with the skills to maximize throughput and deliver exceptional quality.

From system color management to understanding the nuances of specialty colors for the 5th Color Station, this program enables your company to enjoy more uptime, less rework and better profitability.

In addition to helping your operators learn how to ensure top-notch color and image quality, topics will be delivered based upon your workflow and printing requirements.

The RICOH Pro C7210X/C7210SX Graphics Arts Edition Certified Operator Training includes:

- Ricoh Media Library management
- TCRU (Trained Customer Replaceable Units) hands-on training
- Advanced color management, image quality and engine optimization techniques

Take the next step with Consulting and Color Management Services

(additional fees may apply)

- Introduction to G7 Color Management Workflow
- Color Management Settings in Adobe Creative Cloud Suite
- Printing to an Industry Standard (GRACoL, SWOP, SNAP)
- 5th Color Station Hands-On Design Training for Specialty Colors
- Soft-Proofing Setup in Adobe Acrobat, InDesign and Photoshop

We've got your back and your future.

Meet The Ricoh Team

The Ricoh Production Print Group is dedicated to seeing you get the most return on your investment and moving your operation forward with confidence. We stay focused on providing the tools and support you need to drive the most value and be successful.

You're supported by our best. Our team consists of skilled production print experts — each averaging 15 years of industry experience. Ricoh's team of production engineers all hold various industry certifications including EFI Fiery® Professional, IDEAlliance G7 Expert, CMP Master (Color Management Professional), and others.

For more information on the Ricoh Certified Operator Program and to schedule the initial training for your digital color printing system, please contact your Ricoh production sales specialist.

The most skilled operators run the most profitable operations. Let Ricoh tailor our Certified Operator Program to meet your business requirements and put your team on a path of continued productivity, efficiency, and profitability.
